EDUCATION

- **National Cheng Kung University** Tainan, Taiwan
Master in Computer Science Sept 2025 –
- **National Cheng Kung University** Tainan, Taiwan
Bachelor in Computer Science Sept 2021 – June 2025

EXPERIENCE

- **Taiwan Space Agency, TASA** Tainan, Taiwan
Avionics Software Intern Jul 2023 – Aug 2023
 - **Embedded hypervisor for safety critical system:** Evaluate the lightweight, open-source embedded hypervisor which aims at providing strong isolation and real-time guarantees.
- **Formula SAE Team, NCKU** Tainan, Taiwan
Chief Engineer Sept 2024 – Present
 - **Project Management:** Leading automotive design, systems integration, and performance optimization for an electric race car.
 - **Electrical Team:** Researching the automotive firmware and circuit design. Implementing the essential algorithms for the torque vectoring system.
- **CSIE, NCKU** Tainan, Taiwan
Teaching Assistant Feb 2022 – Jun 2023
 - **Computer System And Network Administration:** Lecturer. Maintaining the online judge system. Preparing midterm exam and homework.
- **Institute of Space Propulsion, NCKU** Tainan, Taiwan
Avionics Leader Sept 2021 – July 2024
 - **Avionics Firmware:** Developed the firmware and applications for rocketry control and telemetry.
 - **Circuits Design:** Designed, implemented the flight computer using KiCAD for flying vehicles.
- **Goodtogo 人嶼物股份有限公司 - 好盒器** Taipei, Taiwan
Software Developer Intern Jul 2022 – Aug 2022
 - **Web Development:** Maintaining the web management system involving front-end and back-end technology such as reactjs, nextjs and mongoDB.
 - **Embedded System Development:** Working on Raspberry Pi and CAT-M1 protocol to develop a cheap solution for IoT device communication.

PROJECTS

- **NCKU CSIE Project Design:** Integrates MEMS-grade IMUs and GPS to improve high-dynamic vehicle positioning and enhance navigation precision despite IMU noise.
- **NCKU CSIE Special Admission:** Admission to universities based on talents and achievements in special areas rather than academic performance.
- **Owl Ground Station:** A pure javascript ground station for model rockets real-time monitoring and communication. 🔗 <https://owl.wilicw.dev>
- **ISP32 Avionics Board:** An ESP32 base rocket avionics board integrates GPS, LoRa and a variety of sensors.
- **2020 AIS3:** A 7-days summer camp of advanced security course held by MOE.
- **Course Choosing Website:** Designed a course choosing and distributing website for students at TAIVS.
- **Project Demonstration Website:** A online platform to demonstrate and manage the projects for high school students. 🔗 <https://info.taivs.tp.edu.tw/topic>
